

Product Sheet

Select and Better Grade, #2 Common and Better Grade. The grades are based on current National Hardwood Lumber Association grading rules to ensure that the highest quality product is provided for both your interior and exterior needs.

The Select and Better Grade is the highest quality and is ideal for any project where clarity of wood with an occasional naturally occurring defect is of the utmost importance. Atlantic Cypress Select and Better is ideal for paneling, flooring, cabinetry, and molding.

Atlantic Cypress #2 Common and Better Grade should be specified for general construction, finish, trim, pattern stock and other uses where the natural characteristics of the tree enhance the appearance of the product.

Atlantic Cypress is ideal for exterior applications where the wood is exposed to the elements. The naturally occurring preservative, cypressene, produced by Atlantic Cypress is resistant to insects, decay, chemical corrosion and other damaging elements. This makes Atlantic Cypress the favorite choice for long-wearing outdoor applications.

Thickness:

4/4, 5/4, 6/4, 8/4

Standard Widths:

4", 6", 8", 10", 12"
