

North American Import Lumber Specialists

Delivering The Difference

What you need.
When you need it.
By people that know and care.

our story

Your source for imported wood products

UCS Global is the international trade division of UCS Forest Group, North America's premier distributor of specialty wood products. We are a full-service importer of quality hardwood, decking, specialty softwood, and veneer and panel products. Let us use our strong relationships with reputable lumber suppliers around the world to help you succeed.

UCS Global began its journey in 2005 when we opened our doors as a direct importer/exporter of lumber worldwide. We initially ventured into selling North American lumber to manufacturers in China. From there we expanded into purchasing panels internationally for the needs of our North American customers.

Today, we have developed a more targeted focus as your source for your imported wood product needs.

Quality Products

We are relentless in our pursuit of finding products of the best value available. Our expertise in sourcing and wood consultation enables us to match suppliers with customers. We are committed to continually researching, evaluating, upgrading and adding new products.

We are dedicated to selling products that come from sources that meet the highest standards of environmental compliance, responsible forestry practices, and respect for human rights.

Extraordinary People

Our people are responsive, knowledgeable and committed to understanding your business.

A key element of our philosophy is treating customers as business partners. Our goal is to provide a complete lumber management solution, by working with customers to determine exactly what you need, sourcing the product from a global network of high-quality suppliers and then delivering it on time.

our product offering
